

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. GENERAL INDEX	623
PROGRESS OF NEW SOUTH WALES, 1860-1890—APPENDIX.	

PREFACE.

THE seven parts which this volume comprises have already been issued separately, and now appear in a collective form with a General Index. Since the publication of the various parts the information contained in them has been subjected to careful revision, and in some few cases the tables have been entirely recast. It is possible, however, that some errors may still remain uncorrected ; if there be any such which come under attention information concerning their nature and position would be gladly received.

The following pages contain statistics only, and should therefore be read in conjunction with the "Wealth and Progress of New South Wales," an annual publication, based for the most part on the figures contained in this volume, and designed, as its title shows, to illustrate the resources of this Colony.

NOTE.—The total number of prisoners under sentence received into the various gaols does not agree with the total sentenced as given in table No. 47. This is accounted for by the fact that many prisoners are transferred from one gaol to another, notably in the cases of Berrima and Trial Bay, where most of the prisoners received were transferred from other gaols.

Woolwashing : Works in connection with stations not included. † Biscuits : A few of these establishments also make bread.
 Boots and Shoes : Factories with less than six hands not included. †† Clothing : Factories with less than ten hands
 included. ‡ Agricultural implement manufactories are not included under any of these heads. ¶ Iron and Brass
 foundries, and Machinery and Engineering should be taken together, for, though efforts have been made each year to
 distribute them into their separate divisions, such distribution has been only partially successful. § Jam-making and
 fruit-canning combined in 1888 and 1889. §§ Accurate information not available prior to 1886. || Saddlery : Only
 leather repairing shops included in 1886-89, but all included prior to 1886.

NOTE.—When more than one kind of work is carried on in one establishment, it has frequently been found
 to distinguish the number of hands, power, and value of plant engaged in the various industries; in such cases
 attributed to the principal industry.

As it is of that importance to accurately estimate the hands in the respective employments, it has been customary to subdivide the work above shown into more than one important industries in order that the hands employed in each of these industries may be more fully understood. Thus where hand making and spinning are carried on in the same establishment, if both industries are large, they would be treated as separate works, and with spinning and weaving and cloth making, &c.

As it is of first importance to accurately classify the hands into their respective employments, it has been customary to subdivide works where more than one important industry is followed. Thus where boot-making and tanning are carried on in the same establishment, if both industries are large, they would be treated as separate works, so with engineering and joinery, brewing and cordial-making, &c.

In addition to this area, which represents the land alienated in fee simple under various forms of sale, there were acres granted for public and other purposes since the foundation of the Colony. The total amount exceeds given in the preceding table by 15,515 acres, and the excess is most likely distributed over several counties. The land alienated in each county will not be available till the revision of all the counties is effected.

* The City of Sydney was first incorporated in 1842, and the mayoralty continued to the end of 1868; the Corporation was then dissolved, and the Government took over the Municipal functions and appointed three "City Commissioners," who administered the affairs till the end of the year 1857, when the old regime was re-established.

** For Municipal purposes, the annual value of unimproved land is taken at 5 per cent. of the capital value shown in this column.

† The amounts shown in this column represent the total value of *all rateable* property in the Municipalities, including unimproved lands, buildings and cultivated lands.

‡ The Borough of North Sydney is formed by the union of the Boroughs of St. Leonards, East St. Leonards, and Victoria.

§ Rates have not been struck for the year 1890.

|| Within this Municipality are mines, the capital value of which is estimated at £13,000,000, that under the terms of the Municipal Act are not liable to taxation.
